

# Cyber Business Risk Management CAPABILITIES OVERVIEW

(T) 919.841.0553 | (F) 919.841.0299

[www.aurorosinc.com](http://www.aurorosinc.com)

## The Auroros Advantage:

Over 100 years of combined relevant experience in our core team: Department of Homeland Security, NSA, FBI, DoD CIO, HQ Army, HQ Marine Corps, and Pentagon Communications and Disaster Recovery.

## What is Cyber Business Risk?

Cyber Risk + Business Impact. Most Cyber Security is compliance oriented and can only play catch-up, focusing on attack prevention. Many organizations are already penetrated and being exploited, with unknown active and potential business impact. Often by insider threats or compromised access credentials. In fact, most compromised organizations suffer exploitation within hours, with the breach not discovered for months.

Auroros provides Cyber Business Risk Management services that combine Cyber Defense with Risk Management principles by using Enterprise Architecture concepts. Auroros can show where you are most at risk for serious harm to your organization's business, beyond only addressing where threats can get in. Auroros provides mitigation assessments and planning that makes sense to business decision makers, and allows practical apples-to-apples choices between investments in IT security and other capital investments.

Business Interruption Loss of Business	Data Breach Data Loss/Corruption	Privacy Liability Intellectual Property	System Damage System Interruption	Remediation Expenses
